

Mathematics Calculation Policy

October 2022

Maximum Effort for Maximum Achievement

About our Calculation Policy

This policy has been written in response to the National Curriculum September 2014 and aims to ensure consistency in the mathematical written methods and approaches to calculation across the school.

At Buttsbury Junior School we believe that children should be introduced to the processes of calculation through practical, oral and mental activities. As children begin to understand the underlying concepts, they develop ways of recording their workings to support their thinking and calculation methods, use particular methods that apply to special cases and learn to interpret and use the signs and symbols involved.

Strategies

Choosing the appropriate strategy and recording jottings in Mathematics is an important tool both for furthering the understanding of ideas and for communicating these ideas to others. The aim is that children use mental methods when appropriate, but for calculations that they cannot do in their heads, they use an efficient written method accurately and with confidence. A useful written method is one that helps children carry out a calculation and can be understood by others. Written methods are complementary to mental methods and should not be seen as separate from them. It is important children acquire secure mental methods of calculation and one efficient written method each for calculation for addition, subtraction, multiplication and division, which they know they can rely on when mental methods are not appropriate.

Progression

The majority of children will move through the policy at broadly the same pace. However, decisions about when to progress should always be based on the security of children's understanding and their readiness to progress to the next stage (stage before age). Children who grasp concepts rapidly should be challenged through being offered deepening problems that are thought stimulating and applicable to real life. However, those who are not sufficiently fluent at a particular stage should not be progressed. It is essential that children's mental methods in all four operations are secure and they are able to use a variety of strategies as appropriate.

This document is organised according to age related expectation, however it may be necessary for teachers to consult with lower year groups for children in order to meet their needs at the stage these children are working at. By the end of Year 6, children are expected to use the formal methods for the four operations.

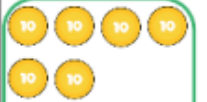

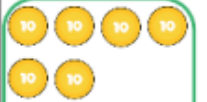

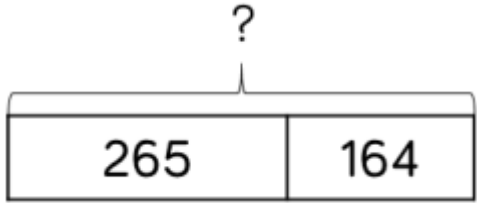

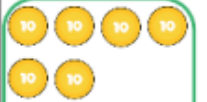

Addition and Subtraction

Year 3

- Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction

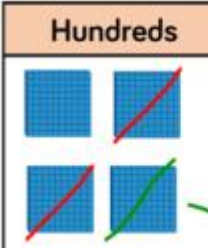

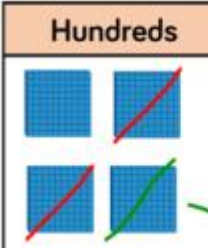

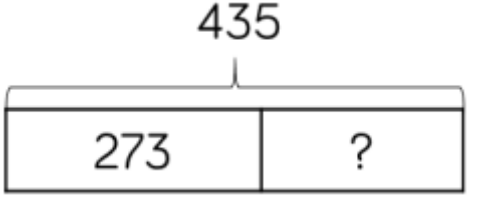

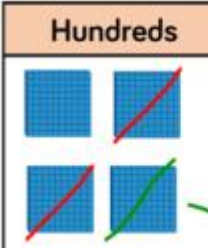

Addition

$$265 + 164 = 429$$

Concrete			Pictorial	Abstract										
<table border="1"> <thead> <tr> <th>Hundreds</th> <th>Tens</th> <th>Ones</th> </tr> </thead> <tbody> <tr> <td>  </td> <td>  </td> <td>  </td> </tr> <tr> <td>  </td> <td>  </td> <td>  </td> </tr> <tr> <td>  </td> <td></td> <td></td> </tr> </tbody> </table>	Hundreds	Tens	Ones											$\begin{array}{r} 265 \\ + 164 \\ \hline 429 \\ \hline 1 \end{array}$
Hundreds	Tens	Ones												
														
														
														

Subtraction

$$435 - 273 = 162$$

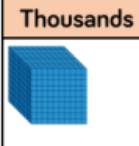

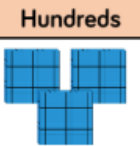

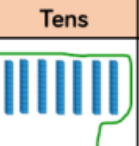

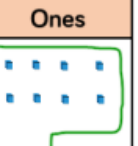

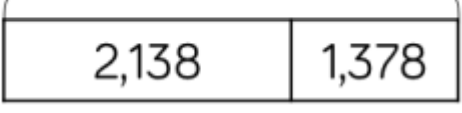

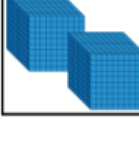

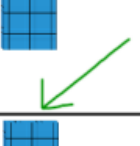

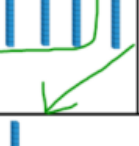

Concrete			Pictorial	Abstract							
<table border="1"> <thead> <tr> <th>Hundreds</th> <th>Tens</th> <th>Ones</th> </tr> </thead> <tbody> <tr> <td>  </td> <td>  </td> <td>  </td> </tr> <tr> <td>  </td> <td>  </td> <td>  </td> </tr> </tbody> </table>	Hundreds	Tens	Ones								$\begin{array}{r} \overset{3}{4} \overset{1}{3} 5 \\ - 273 \\ \hline 162 \end{array}$
Hundreds	Tens	Ones									
											
											

Year 4

- Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate

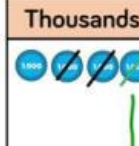

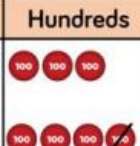

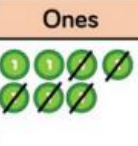

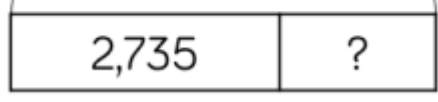

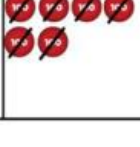

Addition

$$1,378 + 2,148 = 3,526$$

Concrete				Pictorial		Abstract																												
Thousands	Hundreds	Tens	Ones	?		<table border="1" style="width: 100%; text-align: center;"> <tr><td>1</td><td>3</td><td>7</td><td>8</td></tr> <tr><td>+</td><td>2</td><td>1</td><td>4</td><td>8</td></tr> <tr><td colspan="4"><hr/></td></tr> <tr><td>3</td><td>5</td><td>2</td><td>6</td></tr> <tr><td colspan="4"><hr/></td></tr> <tr><td>1</td><td>1</td><td colspan="2"></td></tr> </table>				1	3	7	8	+	2	1	4	8	<hr/>				3	5	2	6	<hr/>				1	1
